Replying NO will quit Couatl.

Yes

No

couatl v3.2 (build 3876)

panic log started on Sun Jan 14 14:16:11 2018

problem raised by addon <unknown>

Traceback (most recent call last):

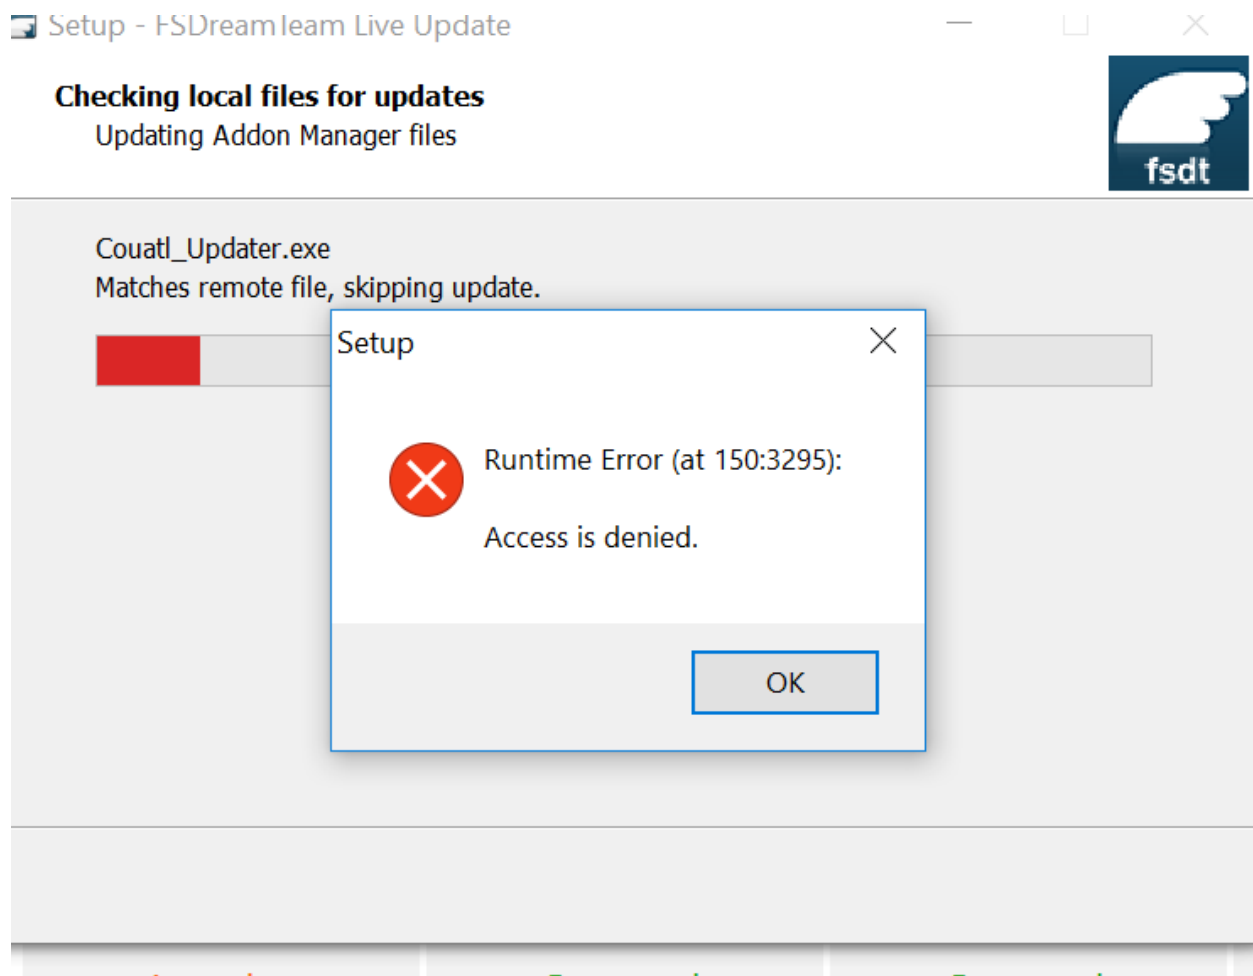

File ".\common\fsm.py", line 73, in executeDoFuncToCompletion

File ".\GSX\assistanceServices__init__.py", line 412, in do

TypeError: not all arguments converted during string formatting

{'Airport': 'CYYJ', 'Requested assistance services at': 'Gate 7', 'User Pos': (48.64142821644153, -123.4300331018639, 21.5954 m, 2.39336 m, 162.27160327194423)}

When I re run the setup for the Addon the update stalls her:

Running Live Updater

The installation is running the FSDT Live Updater.

Setup

Error 3 running C:\Program Files (x86)\Addon Manager\Couatl_Updater.exe which means The system cannot find the path specified

OK
