

# GSX Pro Aircraft Profile for the Aerosoft CRJ700

## Features:

- All doors customized via the GSX Pro aircraft editor.
- ground equipment connects more accurately.
- Front and Rear bags are loaded via a belt loader
- Working refueling, de-icing and GPU connections.
- Solid catering ramp connection.
- Embedded staircase adjusted at start and stop positions

## How to install:

To install, simply extract the .zip file downloaded from [flightsim.to](https://flightsim.to) and move the "Aerosoft\_CRJ\_700" folder inside the following directory:

"Drive\Users\Username\AppData\Roaming\virtuali\Airplanes"

If you don't already have a folder named "Airplanes" inside your Virtuali folder, right-click and create a new one.
